patidarhardik81@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

SUMMARY

Full-stack developer with strong backend focus and experience in building scalable web applications using React, Node.js, and REST APIs. Familiar with deploying applications using Docker, CI/CD pipelines, and basic AWS services. Interested in building reliable and efficient systems for real-world use cases.

EDUCATION

SRM Institute of Science and Technology, Tamil Nadu

Jun 2023 – May 2027

B.Tech in Computer Science and Engineering (Big Data Analytics)

CGPA: 9.15/10

SKILLS

Programming	Python, C++, JavaScript, TypeScript
CS Fundamentals	Data Structures & Algorithms, Object-Oriented Programming
Web Development	React.js, Node.js, Express.js, HTML, CSS
Backend & APIs	REST APIs, Flask, JWT Authentication
Databases	MongoDB, PostgreSQL, SQL
DevOps & Cloud	Docker, Jenkins, CI/CD, AWS (Basics)
Tools	Git, GitHub, Postman, Jest
Soft Skills	Collaboration, Adaptability, Time Management, Willingness to Learn

PROJECTS

Campus Crisis Radar — Real-Time Web Application

Mar 2026

[GitHub](#) — [Live](#)

- Built a real-time campus safety platform where users can report incidents and send panic alerts with location.
- Implemented JWT-based authentication and role-based access for secure usage.
- Integrated Socket.io to handle real-time alerts and updates between multiple users.
- Developed REST APIs and deployed the system, supporting real-time communication and multiple concurrent users.

Law Firm Case File & Access Management System

Apr 2026

[GitHub](#)

- Built a web application to manage legal case files with different user roles and permissions.
- Developed the system using React, Node.js, and PostgreSQL with REST APIs.
- Used Docker for containerization and Jenkins for CI/CD pipeline setup.
- Deployed the application on AWS and performed testing using Jest along with blue-green deployment strategy.

MediAssist-AI

Apr 2025

[GitHub](#) — [Live](#)

- Built a web application that provides medical information based on user symptoms.
- Integrated Google Gemini API to generate responses.
- Developed frontend and handled API requests for generating results.

CERTIFICATIONS

- Software Engineering Job Simulation — Forage
- Oracle Cloud Infrastructure — Generative AI Professional
